Projects

Virundhu – Food Delivery Application

Sept 2026 – Present

Java, JSP, Servlets, JDBC, MySQL, HTML, CSS, JavaScript

- Currently developing a food delivery application focused on browsing food items and placing food orders.
- Building the application with an emphasis on user-friendly navigation, responsive UI, and an organized food ordering experience.
- Developing and refining application features as part of an ongoing project.

SmartCareer – AI driven career guidance and job fraud detection platform

Feb 2026 – May 2026

MERN Stack, Google Gemini AI, NLP

- Built and debugged an AI-powered career guidance platform, resolving issues in MBTI-based recommendations and skill-gap analysis modules.
- Developed and tested an NLP-based fraud detection feature to identify fake job postings, strengthening backend troubleshooting and API integration skills.
- Integrated Google Gemini AI into the career guidance workflow to support personalized career recommendations and provide AI-driven insights based on users' skills and interests.

Internship Experience

Full Stack Developer Intern | TAP Academy

May 2026 – Present

- Developed full-stack applications using Java, Spring Boot, Hibernate, MySQL, ReactJS, and REST APIs, following clean and scalable architecture.
- Built backend modules with Spring Boot, implemented secure authentication, and optimized API performance.
- Designed responsive React components, improved page load speed, and enhanced user experience.

Web Development Intern | Future Focus Learning Hub, Salem

Jan 2026 – Feb 2026

- Completed intensive, hands-on web development training, gaining practical knowledge of core web technologies and fundamental website development concepts.
- Worked on web development projects and practical tasks, applying technical concepts to strengthen coding skills and understand the implementation of web-based solutions.
- Strengthened web development fundamentals through practical tasks and received an Excellent performance assessment.
